Background/ Reason for Issue

Review carried out by the Network Rail Geometry Measurement Engineer has resulted in a revised scope of acceptance and updated operating conditions of use.

Network Rail action

- Each party in the Network Rail supply chain receiving a product is responsible for ensuring conformance to specification.
- Deficiencies in performance affecting the accepted functionality of the product or safety integrity identified by users of the product shall be reported in writing to Network Rail Acceptance National Specialist Team.
- Any party becoming aware of a change to the product configuration (to the actual product or its application); and a variation to or addition of manufacturing locations or processes shall inform the Network Rail Acceptance National Specialist Team in writing.

For use by PADS agent: EC Interoperability

Product: TQM Track Quality Measuring Recorder

Manufacturer: Railcare Advanced Instruments Ltd
35 St Lawrence Drive,
Pinner. Middx. HA5 2RW

The product above is accepted for use on Network Rail infrastructure within the defined scope of acceptance and any specific conditions in the certificate. Failure to abide by the certificate requirements may lead to acceptance by Network Rail becoming invalid.

Scope of Acceptance

For the measurement and recording of Track Geometry (twist, gauge, top, line and crosslevel).

Specific Conditions:

See following pages for more detailed specific conditions of use and the product configuration.

Authorised by:

Bob Cummings CEng, MICE
Professional Head of Track Engineering

Certificate of Acceptance

Certificate No: PA05/02253 Issue: 2 Date: 22.06.06
Effective date: 22.06.06 Page 2 of 3

SPECIFIC CONDITIONS (Manufacturer/Supplier)

- Manufacturers and third party suppliers should take note of the requirements under Quality Assurance.
- Any deficiency affecting the product quality, functionality and safety integrity shall be notified in writing within 48 hours (including corrective action undertaken or proposed) to the Network Rail Acceptance National Specialist Team.
- Any intended change to the accepted product shall be put forward in writing to the Network Rail Acceptance National Specialist Team. Changes include:
 - a change to the product configuration (to the actual product or its application);
 - a variation to or addition of manufacturing locations or processes; and
 - a change in the name or ownership of the manufacturing company.

SPECIFIC CONDITIONS (User/Operators)

- Users are responsible for ensuring compliance with the following conditions. If a condition is not understood guidance must be sought from the Acceptance Specialist.
- Each party in the Network Rail supply chain receiving a product is responsible for ensuring conformance to specification.
- Equipment may only be used in "Green Zones"
- Safe Systems of Work shall be in place for **ALL** operational circumstances on Network Rail infrastructure.
- Equipment must NOT be used in live conductor rail areas. Traction current to be isolated before the use of this equipment in D.C. electrified areas.
- If equipment is to be left unattended when on track, the brake must be applied.
- Brake shall be tested by the operator at the start of each shift.
- All staff required to use the equipment shall be suitably trained and competent to do so.
- Equipment shall be maintained in accordance with the manufacturer's recommendations.
- Equipment shall be repaired / serviced by the manufacturer or its nominated agent only.

SPECIFIC CONDITIONS (General)

- Operator and training manuals shall be made available to users of the equipment.
- Maintenance manuals and an appropriate level of training shall be provided for maintenance of the equipment.

QUALITY ASSURANCE

- The manufacturer and any third party suppliers of the product are responsible for ensuring conformance to specification.
